Capacitor

Information regarding the type of capacitor that may be used for the horizontal retrace capacitor C4401 in the CTC168 and CTC169 chassis as outlined in SB-CTC168/169 SI3 has been changed.

Improvements in the reliability of the blue box type capacitor now permit its use as a replacement part for C4401. The box type capacitor or the dipped type capacitor are now suitable for replacing defective C4401's.
